

Dear [Hiring Manager's Name],

I am thrilled to apply for the Power BI Developer role at KPMG India. With over four years of experience in data analytics and visualization, coupled with my passion for transforming raw data into actionable insights, I am eager to contribute to KPMG's commitment to delivering technology-enabled solutions across industries.

In my current role as Team Lead - Data Management at ConvergenSEE India, I have:

- **Designed and Maintained Interactive Dashboards:** Created Power BI dashboards to consolidate multi-platform data, offering real-time insights that supported key business decisions and improved reporting accuracy.
- **Optimized Data Models:** Engineered efficient data models tailored to business needs, enhancing the performance and scalability of analytics solutions.
- **Integrated Data-Driven Solutions:** Collaborated with cross-functional teams to embed Power BI reports into applications, elevating operational capabilities and decision-making efficiency.
- **Implemented Advanced Security and Governance:** Applied row-level security and adhered to governance policies to ensure data compliance and reliability.

My proficiency in Power BI, DAX, and data modeling, combined with a strong foundation in data visualization and advanced analytics, aligns seamlessly with the responsibilities of this role. Beyond technical skills, my experience in collaborating with stakeholders and driving performance optimization reflects my ability to deliver impactful solutions in high-paced environments.

KPMG's reputation for fostering innovation and leveraging technology to solve complex business challenges resonates deeply with my professional aspirations. I am particularly inspired by your

emphasis on creating performance-based and industry-focused services, and I am eager to contribute to these initiatives through my expertise.

Thank you for considering my application. I am enthusiastic about the opportunity to bring my skills to KPMG India and would be delighted to discuss how my background and experience align with your needs.

Warm regards,

Rishav Mishra

Data Analytics and Management Professional
